Daycare Centres of the AWO Karlsruhe

For a good Start in Life

Herzlich Willkommen – bonjour – welcome – Buenos días – salamu aleikum – wa aleikum assalam!

This booklet provides an insight into the variety of our 18 daycare centres. Our qualified staff care for some 1,000 children, of which 400 are placed in bilingual institutions (German-French, German-English), which are distributed all over the city. AWO Karlsruhe daycare centres, rely on expert and quality concepts such as bilingual education according to the immersion principle, a modern playful approach to MINT* topics, and exciting sport offers, which actively stimulate the children's natural need for movement.

*(mathematics, computer science, natural sciences and technology)

Healthy eating habits develop very early. Fresh fruit and vegetables as well as special menus for toddlers are part of our daily offer prepared in our own AWOKADO kitchen.

All of our daycare centres are certified to AWO's Tandem Model. Meaning that they comply with the requirements set out in AWO's quality criteria and DIN EN ISO 9001.

Mission and Objectives

We derive our mission and objectives from the § 22 SGB VIII, the orientation plan for daycare centres in the Federal State of Baden-Württemberg and from AWO's mission statements. This legal mandate provides for education, training and care of the child and outlines the importance of orienting values and boundaries. The educational work in our daycare centres is based on a cross-institutional and international understanding of education.

Current scientific findings are translated into modern, educational concepts. We stimulate and tap into the children's interests through themed learning topics such as bilingual education, focuses on movement and/or music, the mixing of children with and without disability, a basic training in natural sciences, etc.

Corporate Childcare Opportunities in Karlsruhe

The single revenue model has run its course: An increasing number of mothers and fathers equally contribute to the revenues of a family. Meanwhile, many employers now adapt their systems by supporting families in bringing work and family together. Their family-friendly approach and corporate daycare systems make such employers highly attractive. This is the reason why AWO Karlsruhe works with corporations

like SIEMENS, Energie Baden-Württemberg AG (EnBW), Verkehrsbetriebe Karlsruhe GmbH (VBK), the Joint Research Centre – Institute for Transuranium Elements, JRC-Karlsruhe, PSD-Bank Karlsruhe Neustadt e.G., Städtisches Klinikum Karlsruhe gGmbH. There are places reserved for the children of the staff of these corporations and institutions in selected AWO daycare centres.

The Educational Concept

Each day offers children a variety of learning contents and options. To them the whole world is a huge, unknown playground which they like to discover and unfold. In their play, they learn to set rules for their joint activities and experience values and boundaries. In their daily interaction with the kids, our qualified employees and management are guided by AWO's fundamental values of freedom, equality, tolerance and solidarity. In a setting, promoting natural acceptance of diversity

and living together peacefully, the children are encouraged to get involved, to take responsibility, and to benefit from being among people of different cultures. In order to promote mutual respect and acceptance, we offer a variety of options helping to familiarise with biographical and cultural diversity, e.g. by intercultural projects and a culture sensitive set-up of our daily childcare routines.

Emphases of our Educational Work

Emphases:

- Convey appreciation
- Promote social skills
- Strengthen personality
- Support autonomy
- Seize and promote joy in movement
- Keep up curiosity and a sense of exploration
- Accompany language learning

We secure the quality of educational processes:

- We design our facilities as challenging environments and select materials that help to arouse interests and to build momentum.
- We challenge physical activities and perceptive experiences.
- We make use of the opportunities offered by our daily routines within and outside our facilities and offer a vast space to explore the world.

- Structured and oriented daily routines in our facilities help the children to feel safe and to thus take full advantage of the offered space for their individual development.
- We allow the children to set up relationships with each other and with adults. In play and in real life they practice behaviours that they need for life.
- We encourage children to open up their world by an accepting and respectful attitude.
- We take a close look, we observe and communicate with the children. In our educational syllabus we work with the topics which are relevant for kids and assist them in exploring their themes.

AWO in Germany

The socio-ethical pillars and the still valid principles of AWO are based on a turbulent past: After World War I Germany was destroyed and in social and economic ruin. Millions of people were in need. It was in this situation that the social democrat Marie Juchacz founded the "Main Committee for Workers' Welfare (AWO)" within her SPD (Social Democratic Party) in 1919. This eventually led to the foundation of the AWO, which has since developed into a socio-politically active membership and service organization. It takes its basic values of freedom, equality, tolerance and solidarity from its past.
